My copy results are unsatisfactory. What are some ways I might resolve my problem?

When You Cannot Make Clear Copies

When You Cannot Make Copies As Wanted

Further Information

Adjusting Copy Image Density

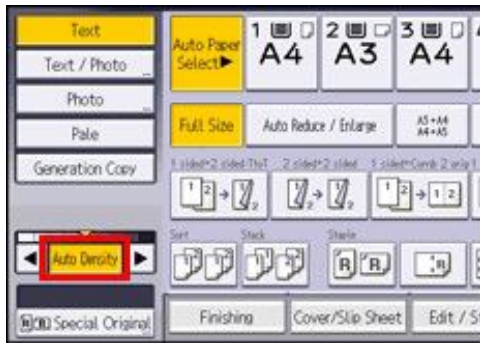

There are three types of adjustment available.

Auto Image Density

The device automatically adjusts the image density by scanning the densities of originals. Dark texture originals (such as newspaper or recycled paper) will be copied so that background will not be reproduced.

1. Make sure that **[Auto Density]** is selected.

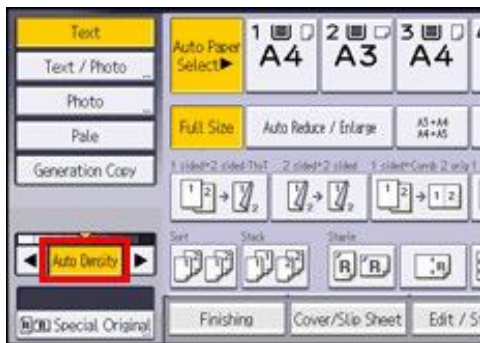

If **[Auto Density]** is not selected, press **[Auto Density]**.

Manual Image Density

You can adjust the density of the overall original in nine steps.

1. If **[Auto Density]** is selected, press **[Auto Density]** to cancel it.

2. Press **[◀]** or **[▶]** to adjust the image density.

The density indicator "▽" moves.

Combined Auto and Manual Image Density

Adjusts the density of an image only for dark texture originals.

1. Make sure **[Auto Density]** is selected.

If **[Auto Density]** is not selected, press **[Auto Density]**.

2. Press **[◀]** or **[▶]** to adjust the density. The density indicator "▽" moves.
